SUMMARY

As a Quality Assurance Tester, I specialize in ensuring software reliability and quality through my testing expertise, effective communication, and collaboration. My work focuses on analyzing and improving software performance while contributing to seamless teamwork and project success. I have built a strong foundation in testing and continuously learn new skills to meet technical demands. Although my background is in Japanese Language and Literature, this experience has enhanced my adaptability in new environments and improved my problem-solving approach. These skills drive my contributions to team efficiency and organizational success.

WORK EXPERIENCE

PT. SYS Indonesia

May 2022 – October 2024

Quality Assurance Tester

- Performed automated White Box Testing using winAMS to ensure input/output validity aligns with the C-based source code logic.
- Designed comprehensive test case documentation to verify that actual results meet expected outcomes.
- Generated detailed reports by comparing debug results against Excel-based verification formulas derived from the source code.
- Executed manual testing as a fallback to address tool limitations or complex bug scenarios in winAMS.
- Reported identified bugs and testing progress directly to the Software QA Lead for resolution.
- Ensure 100% code coverage by verifying that every line of the function is executed and inspected.

PT. Rank A Indonesia

August 2021 - December 2021

Admin Staff

Responsible for developing digital advertisements aimed at increasing customer engagement

- for Japanese language learning, as well as managing documentation using Microsoft Office tools, including Excel, Word, and PowerPoint.
